said county, having voted for Mr. Doug-las at the late Presidential election, was excommunicated by his church! On Thursday, succeeding the election, a meeting was called to take the pastor's case into consideration. The question of his proslavery voting was discussed and severely denounced. A member arose to speak on the impropriety of the Church mingling in politics, and the injustice done in pro-scribing the Elder for his political views, valuable members have signified their intention to withdraw from the Church, and great excitement and bitterness prevail in the community .- Rochester Union.

The Sabbath.

Among the beautiful inctitutions handed down to us by Jewish dispensation, none can exceed the Sabbath Day. There is a benevolence, a wisdom, a holy justice about it, which cannot fail to strike with deep admiration and reverence every sound thinking and farseeing mind. Our creator saw its wisdom and the need of it. Without it man would be weary with care and become too selfish, oppressive and earthly. His physical powers require ry of his God. The Jews threw around the Sabbath a false and ceremonious sanctions which arise from it, such as Envering and Skin Diseases, St. Asthony's Fire, and Skin Diseases, Property of Environments, Property of Environme rest, and his mind must gaze on the gloinstituted for the good of man, and that good acts done on that day, in view of RHEUMATION, SYPHILLITE and MERCURIAL DE the glory of God were praiseworthy .- LASES, DROPSY, DYSPERSIA, DEBILITY, and, The blindness of the Jevs could not see this. The spirit with them was nothing—the form and the letter everything.—

the form and the letter every In their eyes a Samaritan, a Greek or a Roman was unworthy of their kindness; but Issus taught the true doctrine of eterbut Jesus taught the true doctrine of eternal goodness to all men. Forms he made secondary to the spirit; and with him the motive of the mind was everything. The institution of the Sabbath is holy and good, and like that of marrige, necessary for man's true happiness, earthly and eternal. To the body it gives rest, to the soul solemn thought, and tendency to worship and benevolent feelings.

Africau Geography.

Within the last thirty or forty years, more has been done in the way of African discovery than before in all time, certainly, than since the time of the Pyramids. Northern Africa was indeed better known to the ancients of Egypt and of Rome, than to any Christian and civilized people of modern times until the French establishment at Algiers revived the study of North African geography. Probably the most eminent of French geographers now alive is M. Lejean. He is at this moment undertaking, at the request of the French government, an expedition to settle forever the source of the White Nile, supposed to be connected with Lake Nyassa. According to the old geographers, the mountains of the moon were supposed to intervene, and even now all that we know is that in the ninth paralel of north latitude, the White Nile spreads out to a width of five or six miles. Beyond that, towards the equator as far as latitude four degrees north it is the drain of interminable marshes.

The Lake Nyassa, or "sea," used to be considered as located in latitude ten degrees south; but it either extends up to the north far more than used to be allowed, or there may be two or more inland lakes of sufficient size to have won that this remedy affords. title for themselves. Every year the la- Prepared by Dr. J. C. AYER & CO., Lowell, Mass. bors of French, Austrian, and Prussian travelers are adding to our knowledge of the continent from the north. From the south the English are now penetrating upwards, and have pretty thoroughly, through the labors of such missionaries as Moffat and Dr. Livingstone, made acquainted with the soil and climate, from the Cape of Good Hope upwards to within five degrees af the equator. These travelers have found the country abounding with navigable rivers, one of the most important of which is the Zaniqessi, which Dr. L. has been navigating with his new steamer from England. The Quillimane, its principal branch, has been ascertained to be fit for navigation, with land on either side admirably adapted to CELEBRATED HOBSE LINIMENT. the culture of cotton, and even now producing large quantities of it.

From the western side, the colony Sierra Leone and that of Liberia have already led to discoveries as to the interior of Africa that will be no less valuable than those we have already alluded to.—

It has now been demonstrated that a very little way back from the coast, on the high lands, the climate is remarkably healthful, and anything but the graveyard which the early experience of the coast of the coast, on the climate is remarkably healthful, and anything but the graveyard which the early experience of the coast of the co graveyard which the early experience of Sierra Leone and even Liberia had caus-

Sierra Leone and even Liberia had caused to be supposed.

The navigation of the Niger, though as deadly were bailly managed, it is not necessarily so, especially to the natives, with proper precautions. Indeed, the rice swamps of South Casolina, within five miles of the city of Charleston, are controlled in the control of the city of Charleston, are controlled in the control of the city of Charleston, are controlled in the control of the city of Charleston, are controlled in the control of the city of Charleston, are controlled in the control of the city of Charleston, and the city of Charleston, are controlled in the control of the city of Charleston, are controlled in the control of the city of Charleston, are controlled in the control of the city of Charleston, are controlled in the control of the city of Charleston, and the city of Charleston, are controlled in the company in the market.

But the interior of Yoruba, explored by English Missionaries and control of the city of Charleston, and the city of the control of the city of the city of the city of the control of the city of the city of the city of the city of the control of the city of the city of the city of the control of the city of the city of the control of the city of the city of the control of the city of the control of the city of the city of the city of the control of the city of the control of the city of t hibits itself in these explorations. The Germans explore the Nile to throw light on history. France penetrates the interior for the purposes of sciences, but the English and Americans keep an eye on the main chance.—Philadelphia Press.

JUST received at the BOOK STORE. Millersburg Call and see them before buying classwhare.

Considerable excitement has been caused at Caughdenoy, Oswego Co., the Utica Observer says, by a most extraordinary act on the part of the Methodist Episcopal Church in that village. It appears that Elder Salsbury, pastor of the Society there, who has been a worthy and eloquent preacher of the Gospel for some forty-five years, and a Presiding Elder for some sixteen years, residing at Central Square in said county, having voted for Mr. Douglas at the late Presidential election, was will visit the iniquities of the fathers upon

their children." Its effects commence by deposition from the blood of corrupt or discrous matter, which, in the lungs, liver, and internal organs, is termed tabercles; in the glands, swellings; and on the surface, cruptions or sores. This foul cor-ruption, which genders in the blood, depresses the energies of life, so that scrafulous constitu-tions not only suffer from scrafulous com-plaints, but they have far less power to with-stand the attacks of other diseases; consewhen the speaker was hissed and stamped down! Tee question of excommunication was put, and the Elder's head rolled from under the Church's guillotin! Several conservation which, although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its erigin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleane it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

AYER'S Compound Extract of Sarsaparilla, the most effectual remedy which the medical skill of our times can devise for this every-where prevailing and fatal malady. It is combined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only Scrofula, but also those other affec-Rose, or Eursipelas, Pimples, Pustules, Blotches, Blains and Botts, Tumons, Tetter and Salt Ribers, Scale Head, Ringworm,

AYER'S

Ague Cure,

FOR THE SPEEDY CURE OF Intermittent Fever, or Fever and Ague, Remittent Fever, Chill Fever, Dumb Ague, Periodical Headache, or Billous Beadache, and Billous Fevers, Indeed for the whole class of diseases originating in biliary derangement, caused the Malaria of Miasmatic Countries.

We are enabled here to offer the community a remedy which, while it cures the above complaints with certainty, is still perfectly harmless in any quantity. Such a remedy is invaluable in districts where these afflicting disorders prevail. This "Cura" expels the miasmatic poison of Erven and Auton from the system, and prevents the development of the disease, if taken on the first approach of its prenability symptoms. It is not only the best remedy ever yet discovered for this class of complaints, but also the cheapest. The large quantity we supply for a dollar brings it within the reach of every body; and in bilious districts, where Favna and acure prevails, every body should have it and use it freely both for care and protection. A great superiority of this remedy over any other ever discovered for the speedy and certain cure of Intermittents is that it contains no Quinne or mineral, consequently it produces no quinism or other injurious effects whatever upon the constitution. Those cured by it are left as healthy as if they had never had the disease.

Fever and Ague is not alone the consequence of the missmatic poison. A great variety of disorders arise from its irritation, among which are Neurabja, Rheumatism, Gout, Headache, Hindness, Toutheache, Euruche, Catavyh, Asthma, Palinghation, Pairrid Affection of the Spicen, Hinsterics, Pain in the Hauets, Coke, Parajus and Derungament of the Stomach, all of which, when originating in this cause, put on the inferimitent type, or become periodical. This "Cura" expels the poison from the blood, and consequently cures them all alike. It is an invaluable protection to immigrants and persons travelling or temporarily residing in the malarious districts. If taken occasionally or daily while exposed to the inferior to accumulate in sufficient quantity to ripen into disonse. Hence it is even more valuable for protec-We are enabled here to offer the community a
